

## **CAMEE TOOL 7-1: An Agreement for the Provision of Limited Professional Services**

### **ABSTRACT**

This document provides a sample agreement for use when the MEP Engineer will provide services to a Client for small projects or investigations. This sample Agreement features:

- A Form of Agreement
- Exhibit A, Terms and Conditions of the Agreement
- Exhibit B, Scope of Services

This short form agreement is recommended for use on small projects with a limited scope of services where the services will be performed within a relatively short time frame.

The agreement may be used as a prime or consulting agreement between the Mechanical/Electrical/Plumbing/Fire Protection (MEP) Engineer and its client. The client could be any party, including the building owner, architect, or the MEP Engineer of Record (MEPR). The form may be modified to use the term MEPR when this is an accurate representation of the services being provided.
