

## **COPS Baseline 6-4: Letter to Property Owner**

### **ABSTRACT**

Notification of land owners adjacent to or nearby to a property being surveyed can serve two main purposes. Notification provides an opportunity to let people know that your field crew(s) will be in the area conducting a survey. The notification can work to prevent uncertainty and relieve anxiety people can have when they see strangers on or near their property.

COPS Baseline 6-4: Note to Property Owners will help firms to explain a survey will be done and can help the firm request information: such as maps and/or personal knowledge that may be of help.
