Smith Seckman Reid's Stephen Lane Named National Engineering Association Fellow

WASHINGTON, D.C. — Stephen Lane, executive vice president for Smith Seckman Reid, Inc. in Nashville, has been inducted into the College of Fellows for the American Council of Engineering Companies (ACEC). The honor recognizes an ACEC member who through their career has elevated the standards of the engineering profession.

ACEC is the Washington-D.C.-based business association representing the interests of more than 5,000 independent engineering companies throughout the United States.

Lane joined Smith Seckman Reid, Inc. in 1978, and assumed increasing responsibilities as a design engineer, project engineer and client manager. For 20 years he has been a member of the firm's Board of Directors, and he is currently executive vice president, leading the firm's business units both in the U.S. and internationally. His expertise in water/wastewater systems resulted in his designing some of the largest membrane water treatment plants in Tennessee.

Lane has also held several leadership positions with ACEC/Tennessee including President and National Director, and he is currently chairman of the organization's Government Affairs Committee.

An active leader in local civic organizations, he has served on the boards of the Middle Tennessee Ronald McDonald House, Vanderbilt Children's Hospital, West Nashville Sports League, and Parents Reaching Out.

The American Council of Engineering Companies (ACEC) is the business association of America's engineering industry, representing more than 5,000 independent engineering companies throughout the United States engaged in the development of America's transportation, water and energy infrastructure, along with environmental, industrial and other public and private facilities. Founded in 1909 and headquartered in Washington, D.C., ACEC is a national federation of 51 state and regional organizations.
