

CASE 962C - Guidelines for International Building Code-Mandated Special Inspections and Tests and Quality Assurance

ABSTRACT

The Guideline is an update of the previous, 3rd Edition to bring it current with the requirements of the 2012 International Building Code. The Guideline describes the roles and responsibilities of the parties involved in the special inspection and testing process, how to prepare a special inspection and testing program, the necessary qualifications of the special inspectors, how to conduct the program and who should pay for the special inspections and test. The Appendix contains sample forms for specifying special inspections and tests and sample letters to be filed with code-enforcement agencies after the program is completed.
