

CASE #7 - An Agreement for Structural Peer Review Services

ABSTRACT

A request to perform a peer review of another structural engineer's design brings with it a different responsibility than that of the Structural Engineer of Record. The CASE #7 document addresses the responsibilities and the limitations of performing a peer review. This service is typically performed for an Owner but may be altered to provide peer review services to others.

As of 2019, the document was legally reviewed and the following changes were made:

What's New:

Termination provision

State-by-state drafting questions and considerations

What's Updated:

Clarified insurance obligations

Modified indemnity provisions

Limitation of liability provisions

Dispute resolution provisions

A companion document to this Contract is CASE 962-G: Guidelines for Performing Project Specific Peer Reviews on Structural Projects
