

COPS Baseline 3-1: *Skills Checklist for the Young Surveyor*

ABSTRACT

As surveying firms struggle to find entry level talent, it is imperative that both firms and applicants know the surveying qualifications required at each level for projects. COPS Baseline 3-1: *Skills Checklist for the Young Surveyor* provides a list of technical skills that a firm will typically require and can expect from an entry level surveyor. This word document can serve as a guide for firms, who can add skills according to their projects. This checklist can also be used as a road map for young surveyors who are looking to track major career and skill milestones.
